

Cancer Trends Progress Report

progressreport.cancer.gov

Online Summary of Trends in US Cancer Control Measures

The **Cancer Trends Progress Report**, continually updated since its first issue in 2001, summarizes our nation's progress against cancer in relation to Healthy People targets set forth by the Department of Health and Human Services. The online report, intended for policy makers, researchers, and public health professionals, includes key measures of progress along the cancer control continuum and uses national trend data to illustrate where improvements have been made.

Report features include:

- Downloadable graphs and Excel data
- Ability to generate printer-friendly custom reports
- Sharing options via email and social media
- Links to related cancers and statistics

Highlights, Trends, & Recent Updates

- Overview of advancements in cancer
- Healthy People targets

Includes charts that summarize measures and an overview of the nation's progress against cancer.

Prevention

- Behavioral Factors: tobacco use, smoking cessation, diet, weight, physical activity, UV exposure
- Tobacco Policy/Regulatory Factors
- HPV Immunization
- Environmental Factors: secondhand smoke, chemical & environmental exposures

Focuses on factors that have been observed to affect a person's risk of getting cancer: behaviors, selected environmental exposures, policy, and regulations.

Diagnosis

- Breast Cancer
- Cervical Cancer
- Colorectal Cancer
- Lung Cancer
- Prostate Cancer

Describes trends in the use of mammography, Pap tests, fecal occult blood tests, colonoscopies, CT scans, and PSA blood tests.

Early Detection (Screening)

- Incidence
- Stage at Diagnosis

Provides rates of new cancer cases by cancer site and by race/ethnicity, as well as stage at diagnosis.

Treatment

- Bladder Cancer
- Breast Cancer
- Colorectal Cancer
- Kidney Cancer
- Lung Cancer
- Ovarian Cancer
- Prostate Cancer

Summarizes trends in quality of care, clinical trials, patterns of care, emerging treatments, and associated outcomes.

Life after Cancer

- Financial Burden of Cancer Care
- Survival
- Cancer Survivors & Smoking
- Cancer Survivors & Obesity
- Cancer Survivors & Physical Activity

Explores 5-year survival rates for some of the leading cancers as well as the economic impact of cancer treatment costs.

End of Life

- Mortality
- Person-Years of Life Lost

Provides data on cancer mortality by major sites, along with years of life lost due to cancer and other major causes of death.
